

MAVERICK®

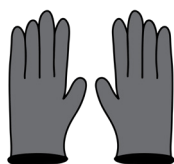

HUNTING BLIND STENCIL KIT

Instructions

WHAT YOU HAVE

Three 18" x 28" Stencils

One Pair of Nitrile Gloves

WHAT YOU NEED

Paint will be needed to complete the project. We recommend camouflage color spray paints that dry quickly.

- + Make sure the paint you choose is made to be used on the material you are covering
- + Use removable puddy or painters tape if you are looking to have complete accuracy
- + Remember to read and obey all warnings on the paint product you choose to use
- + **NOTE:** Beverages not required, but suggested

1

Preparing your Blind

- + If you have not fully assembled your blind yet, leave the windows off until after painting
- + If your blind is fully assembled, make sure to open your windows or tape off anything you would not like to get paint on
- + Wipe off your blind if needed to make sure the paint adheres to the blind

2

Painting Your Blind

- + Determine how you want the blind to look, where it will be placed and what stencils you need to achieve that design.
- + Before applying paint to the stencil, do a test spray on a separate surface to get a feel for the spray pattern and pressure.
- + Apply light and even coats of paint. Avoid spraying too much paint at once to prevent drips or smudging.
- + Allow the paint to dry between coats. Apply additional coats if needed to achieve the desired color intensity.
- + You can flip or rotate the stencil to achieve various patterns.

3

Share Your Final Product

- + We would love to see how you used your stencils and made the blind your own

Ways to Share

- + **Social Media** - Use the Hashtag #MyMaverick and tag Maverick Hunting on Facebook, Instagram, YouTube or TikTok
- + **Leave a Review** - Leave a review and attach a photo on MaverickHunting.com
- + **Submit Your Story** - Upload your before and after photos or share your process at maverickhunting.com/share-your-story
